

V HARISHWAR

Hyderabad, India

+91 8464969558 — harishwar2613@gmail.com — LinkedIn — GitHub

Objective

Final-year B.Tech student in AI & ML with hands-on experience building production-grade AI systems including Graph-RAG architectures, multi-agent workflows, and full-stack applications. Skilled in Java, Python, LLM integration and scalable software development. Seeking SDE or AI Engineer internship/entry-level roles.

Education

Anurag University, Hyderabad

2023 – Present

Bachelor of Technology in Artificial Intelligence and Machine Learning

CGPA: 8.6

CV Raman Junior College, Wanaparthy

2021 – 2023

MPC (Mathematics, Physics, Chemistry)

Percentage: 95.6%

Technical Skills

Languages: Java, Python, C, SQL, HTML, CSS

Frameworks: React, Node.js, Express

Databases: Neo4j, PostgreSQL, MySQL

AI & ML: LLM, RAG, AI Agents, Prompt Engineering, Scikit-learn, NumPy, Pandas

Operating Systems: Linux (Ubuntu)

Tools: Git, Linux CLI

Projects

OMNIGRAPH Intelligence – Enterprise Graph-RAG Platform | GitHub

Node.js, Neo4j, PostgreSQL, OpenAI, Groq

2025

- Built an enterprise AI platform that ingests PDFs and reports, extracts entities/relationships, and stores them in a Neo4j knowledge graph for multi-hop reasoning and intelligent search.
- Designed Graph-RAG pipelines combining graph traversal with LLM generation; implemented dual-model fallback (OpenAI + Groq) achieving higher inference availability.
- Delivered graph visualization, impact-analysis dashboards, and secure REST APIs for enterprise knowledge discovery.

AI Code Reviewer | GitHub

React, Vite, Node.js, Express, Groq, Zod

2025

- Developed a full-stack AI code-review platform for Python, Java, C, and C++ with automated issue detection, severity classification, and improvement suggestions powered by Groq LLMs.
- Built a syntax-highlighted IDE-style editor UI and scalable Express APIs with Zod input validation and structured JSON responses.
- Reduced manual code-review time by surfacing actionable feedback including future-risk analysis in a single pass.

AI Roast ↔ Motivation Switcher | GitHub

Python, Streamlit, Groq API

2025

- Built a generative AI application leveraging Groq-hosted LLMs to generate personalized responses across multiple conversational personas including Mentor, Motivation, Roast, and Savage modes.
- Engineered dynamic prompt templates and temperature-controlled inference pipelines to support diverse response styles while maintaining contextual relevance.
- Developed a responsive Streamlit interface and integrated OpenAI-compatible APIs, demonstrating practical experience in LLM application development and prompt engineering.

Certifications & Achievements

NPTEL Certifications – Introduction to C Programming; Introduction to Machine Learning. [CERTIFICATE]

MathWorks Machine Learning Onramp – Practical ML workflows and MATLAB-based tooling. [CERTIFICATE]

Design Thinking Certification – Problem-solving, innovation, and real-world impact methodologies. [CERTIFICATE]

Leadership & Activities

IEEE Tech Team Member – Organized and coordinated hackathons, technical events, and provided technical support for the student chapter.

IIT Hyderabad AIML Workshop – Participated in a 2-day hands-on workshop on AI/ML concepts and real-world applications.
